Summary

A highly motivated and detail-oriented Full Stack Developer with a strong foundation in front-end and back-end technologies. Proficient in HTML, CSS, JavaScript, and frameworks like React.js, along with backend technologies such as Node.js and databases like MySQL. Passionate about building responsive, user-friendly web applications and eager to learn and grow in a dynamic development environment. Strong problem-solving skills, adaptability, and a keen interest in exploring new technologies. Looking for an opportunity to contribute technical skills and creativity to innovative projects.

Experiences

IT INTERN

Criss Financial Limited l Hyderabad - India(Jan 2025- Present)

- **Prarambh (Onboarding Website)** – Currently working on Prarambh, an onboarding website designed to streamline and automate the employee onboarding process, significantly reducing the time and effort required by the HR team, which was previously handled manually.
- **SSFL & CFL CMS** – Working on converting the entire SSFL and CFL websites by implementing a full-stack approach, developing both the frontend and backend to enhance functionality, performance, and user experience.
- Implemented a **health insurance system** covering employees and their families, ensuring seamless enrollment, claims processing, and benefits management.

FRONTEND DEVELOPER INTERN

Bista Technology l Noida - India(May-July 2024)

- Company's Website (Frontend Development) – Developed the frontend of a company's website using HTML, CSS, JavaScript, and Bootstrap to create a responsive and visually appealing user interface, ensuring a seamless user experience.

Frontend Developer Intern

Buck Softech Pvt. Ltd. l Ranchi - India(October-November 2021)

- **Novel Book Website(1 Month)** – Designed and developed a novel book website using HTML and CSS to showcase a collection of books, providing an interactive and engaging platform for users to explore various novels and authors

Key Achievements

Early Onset of Stroke prediction using Advanced Machine Learning(Research Paper)

- Conducted research on stroke prediction using advanced machine learning techniques. Implemented models to analyze patient data, identify risk factors, and enhance early detection accuracy. The study focuses on improving predictive analytics in healthcare through data-driven insights.

Certifications

- Python Fundamental For beginners(Great Learning)
- Frontend Development HTML (Great Learning)
- Analyzing and Visualizing Data with Microsoft Power BI (skill Nation)
- Introduction to Cybersecurity(cisco Networking Academy)
- Introduction to IOT (Cisco Networking Academy)

Projects

Water Level Monitoring system

An IoT-based college project for efficient water management

- Water Level Monitoring System (IoT-based College Project) – Built an IoT- based water level monitoring system to track and manage water levels in real time. The system uses sensors and microcontrollers to provide automated alerts and prevent water wastage, ensuring efficient water management.
